

## E is for evolution

Your business is our business. Bell Articulated Dump Trucks haul more, for longer at the lowest cost-per-ton to deliver more on your profit margins.

As a global leader in Articulated Dump Trucks, Bell Equipment brings you the world class E-series range. The evolutionary E-series is packed with class leading features that deliver production boosting payloads, lower daily operating costs, superior ride quality and uncompromised safety standards.

Bell E-series ADTs will give your business the competitive edge you need.

• Extensive use of high-strength, lightweight materials give our trucks the best payload-to-mass ratios and hauling efficiencies in each class.

• With their oscillating frame and high-flotation tyres, Bell trucks won't leave you stuck in muddy, rutted or hilly terrain.

• The redesigned, soundsuppressed cab features fatigue-beating controls, an advanced diagnostic monitor with B-drive and a sealed switch module for convenient, fingertip operation of machine functions.

• Fuel-efficient emission-rated engines deliver clean power without compromise in all conditions. Leading-edge emissions technology ensures rapid engine response and dependable cold-start performance.

The E-series range takes ADT functionality to new industry standards, with customer-focused enhancements delivering the highest level of automated operator and machine protection available.

Through substantial investments in research and development and employing industry-leading technology, advancements in the key areas of performance and fuel efficiency help you to move more material at lower operating costs with even less impact on the environment.

Specifications	<b>B40E</b>	B45E	B50E

# Building on pedigree

Building on from the proven D-series platform, Bell Equipment's evolutionary approach to design delivers optimised power-to-weight ratios and legendary fuel efficiency.

• High-travel suspension keeps all tyres in constant contact with the ground, for optimum traction.

• Automatic Traction Control (ATC) is achieved with speed sensors providing feedback to the truck's on-board computer, which controls the differential lock activation as required. Coupled with, best in class rear suspension travel, this results in unparalleled off-road ability.

• Automatic retardation slows the truck when the operator backs off the accelerator pedal providing more confidence on steep grades.

• An industry leading, fully automatic seven-speed planetary transmission with torque converter lock-up maximises fuel efficiency. • Electronic common rail fuel system provides high injection pressures even at low engine speed for improved coldstarting ability, low-speed response and reduced emissions.

• Bell ADTs have the best approach angle to attack steep terrain owing to careful engine packaging and the front chairs design.

• Improved payloads, faster haul cycles and industry leading fuel economy all help you move more material at a lower-cost-per-tonne than the competitors.

• Optimised payload-to-weight ratios decrease your cost-pertonne meaning more of your fuel cost is spent moving the material rather than running the machine.

Planetary powershift transmission optimises shift points to match conditions and vehicle weight while protecting the transmission from operator error and abuse. Allison FuelSense® calibration optimises production and fuel burn.

The transfer case inter-axle differential delivers equal torque to each axle when traction is favourable. When conditions deteriorate, the diff-lock automatically engages to deliver torque to the tyres that can best use it.

High-strength steel and widely spaced taper roller bearings in the articulation area enhance long-term durability.

A tailgate is available as an option for better material retention. The tailgate opens as the bin is raised for dumping. Unlike chains, the spring steel straps in a Bell ADT bin maintain a positive seal throughout the haul ensuring minimal material is lost. Our innovative front and rear comfort ride suspension options are offered to even further enhance ride quality and ensure minimal whole body vibration exposure.

Productivity increases through reduced cycle times, and reduced haul road maintenance are even further benefits of these extremely successful systems. Experienced ADT operators who have driven trucks installed with these systems have come away amazed by the comfort of the machine, as well as the confidence that the adaptive front suspension engenders.

# Uncompromised durability

Built smarter, to work harder. Bell ADTs offer optimised machine weights so you spend more time and money on moving material and not running the machine.

With decades of ADT experience, the Bell E-series articulated hauler is designed and manufactured using purpose built, reliable Bell components best suited for the toughest of conditions.

The central oscillation joint, high suspension travel on all axles, and balanced weight distribution provide the agility and ability to navigate hostile terrain.

The high-strength steel chassis delivers strength and rigidity without excess weight.

• Fully enclosed, flooded, dual circuit wet disc brakes offer superior braking performance and extended service life essential for wet and muddy conditions. Oil-immersed wet-disc brakes are virtually maintenance-free and feature a high flow circulation system with cooling and filtration.

- Viscous, electronically controlled, direct-drive engine fans provide effective cooling and the best efficiency.
- Class leading engine braking, coupled with automated brake retardation, provides superior braking power whilst brake retardation occurs at pressures low enough to ensure no contact between wet brake plates resulting in zero wear.

For comfortable productivity, the A-frame suspension system coupled with hydropneumatic suspension struts reduce the discomfort of lateral vibration often experienced with off-road conditions. A superior suspension seat provides additional isolation for the operator.

Rough terrain demands tough suspensions. Heavy-duty components absorb shocks and come back for more. You get best-in-class suspension travel and ground clearance, too.

Other uptime-boosting features include world class on-board diagnostics with live stream functionality, solid-state sealed switches and satellite fleet management system.

High-strength welded-alloy steel chassis and reinforced articulation joints, offer superior strength and durability with optimised weight for class leading power-to-weight ratio. Lower machine mass reduces powertrain and structural stress.

## Operate with ease

Using the latest in automotive technology and state-of-the-art tooling, the E-series takes operator experience to new heights.

Climb into the cab of a Bell ADT and you will feel right at home. Its quiet, spacious interior, ergonomically positioned operator station and climate-controlled cabin is loaded with productivity boosting comfort and convenience features that minimise operator fatigue and enhance the operator's experience.

Modern flowing lines, in keeping with current styling trends on road vehicles, offer unsurpassed levels of visibility.

From the state-of-the-art 10" full colour screen, automotive mouse interface and sealed switch module to air suspension seat, tilt/telescoping steering wheel and optional CD player with high-output speakers, the E-series provides everything your operators need to perform at their best.

• The standard soundsuppression package significantly reduces noise levels and operator fatigue.

• A fully adjustable airsuspension seat with variable damping, auto height adjust according to operator weight, pneumatic lumbar support and multipoint harness for classleading comfort and safety.

• New machine styling and cabin design improvements, which include full glass access door and high visibility mirror package, provide exceptional all-round visibility. • The adaptive transmission control adjusts clutch engagement to ensure smooth, consistent shifts throughout the life of the truck.

• A purpose designed HVAC climate control system with automotive-style louvres keeps the glass clear and the cab comfortable.

• You won't find retarder pedals or levers in a Bell truck. Retarder aggressiveness is simply set on the switch pad. Everything else is automatic.

Easy-to-understand instruments and intuitive controls wrap around the operator so they're easier to view and operate.

A user friendly, multi-language, 10" colour display unit offers vital operating information, safety warnings, detailed diagnostic readings and dump body function settings.

The Bell automotive sealed display controller, B-drive, enables easy navigation of the CDU for access of machine information and adjustment of machine settings.

Convenient sealed switch module provides fingertip control of numerous productivity enhancing functions including: **Keyless Start, I-Tip, Dump Body Upper Limit, Soft Stop/Hard Stop Selection, Retarder Aggressiveness and Speed Control.** 

## Safety, our business too

By listening to users and delivering on expectations in an ever changing workplace, we provide a truck that leads in application safety with numerous groundbreaking innovations.

Independent features such as Keyless Start, Hill Assist, Bin Tip Prevention, Auto Park Application (APA), Standard Turbo Spin Protection and On-Board Weighing (OBW) are still standard on the E-series.

For improved safety and productivity, the E-series has Automatic Traction Control (ATC).

• Full handrails (to ISO 2876) can be installed to offer improved safety when performing engine checks.

• The park brake automatically applies when neutral is selected and it is not possible to engage neutral at speed. Torque dependent park brake release (Hill Assist) ensures no roll back on slopes.

• All trucks can be set up to automatically sound the horn when starting or switching between forward and reverse. • Best-in-class retarder and engine braking automatically applies when the operator lifts his foot off the accelerator. Retarder aggressiveness can be simply adjusted on the sealed switch module ensuring maximum descent control for all conditions.

• Multiple geofencing in challenging site conditions ensures safe machine operation, such as downhill speed control, geofence speed limits and bin restrictions.

Our quiet operator cabins are ROPS/ FOPS certified with an air suspension operator seat. The trainer seat has a retractable lap belt while the operator seat has a standard 3 point seat belt. Both have automatically locking retractors.

An optional integrated reverse camera and high visibility mirrors ensure superior all round visibility.

Keyless start, driver identity and access codes ensure no unauthorised operation of your equipment.

The exclusive on-board weighing presents the operator with real time information on the payload while the machine is being loaded. A 'speed restriction' mode can also be activated if the machine is significantly overloaded.

B50E

.

The incorporation of a pitch and roll sensor in the vehicle prevents bin operation if the truck is in an unsafe position.

Both operator or site selectable maximum speed control allows the vehicle to automatically decelerate and apply the retarder to prevent onsite speeding.

BER

THE OWNER WATCHING TO THE OWNER OF THE OWNER OWNER

## 1

# Maximise your uptime

The E-series is loaded with features that make it as easy to maintain as it is to operate. Spend less time and expense getting ready for work and more time getting work done.

Easy-to-reach dipsticks and grouped service points make quick work of the daily routine. Quick-change filters, extended engine and hydraulic oil-service intervals lower daily operating costs and provide superior machine uptime.

The industry leading, 10" colour monitor offers on-board machine diagnostics as well as automated daily service functionality, coupled with diagnostic test ports, for ease of troubleshooting and informing maintenance decisions on site.

If something goes wrong, the diagnostic monitor provides service codes and supporting info to help diagnose the problem.

The cab can be tilted in minutes without special tools, for convenient service access to drivetrain components.

An in-cab load centre simplifies fuse replacement. Fewer relays, connectors and harnesses mean higher reliability.

The remote transmission filter option makes transmission filter replacement an even faster and cleaner task.

See-through fluid reservoirs and sight gauges let you check fluid levels at a glance.

Easily accessible test ports allow technicians to troubleshoot problems more quickly.

The centralised lube bank places difficult-to-reach grease points within reach.

The convenient and easy to understand RSG decal details daily checks and actions (eg: greasing).

• Automated daily service checks can be done with ease and comfort from inside the operator station using the 10" colour LCD monitor and sealed display controller.

• The load-sensing hydraulic system was designed with simplicity in mind, while maintaining efficiency. Fewer components for improved reliability and serviceability.

• Extended engine transmission and hydraulic oil-change for increased uptime and lower operating cost.

• Available environmental drains allow quick, no-spill changes.

• Your Bell Service Centre has the parts and backup you need to stay productive and offers a wide variety of preventative maintenance and support programmes to help you control costs.

SUPPORTING YOU EVERY STEP OF YOUR BELL OWNERSHIP EXPERIENCE

## Smarter fleet management

## Cutting edge technology, helping you run your fleet smarter. Providing accurate, up-to-date operational data, production data and diagnostic data.

三方法 合建的基本下合齐

The key to a productive and profitable fleet, lies in the ability to monitor and manage your machines and operators efficiently. Machine operational data is processed and compiled into useful production and performance statistics, accessible via the Bell Fleetm@tic® website. These reports are also automated and emailed directly to you. The two monitoring packages that we have available, are:

• The Classic Package supplies you with good enough information for you to have a very good understanding of how your machine is operating for each shift that it runs. This package comes standard with the machine for 2 years.

• The Premium Package is focused on customers who need to have extremely detailed information of the machine's operation. For this package we offer similar information to that of the Classic Package but for each individual laden - unladen cycle. In addition, live tracking is available on the Fleetm@tic® website on a per minute basis.

### Fleetm@tic<sup>®</sup>:

## **B40E** Articulated Dump Truck

#### **ENGINE** Manufacturer

Manufacturer Mercedes Benz (MTU)

Model OM471LA (MTU 6R 1300)

Configuration Inline 6, turbocharged and intercooled

Net Power 380 kW (510 hp) @ 1 600 rpm in accordance with UN ECE R120

Gross Torque 2 600 Nm (1 918 lbft) @ 1 300 rpm

Displacement 12,8 litres (781 cu.in)

Auxiliary Brake Jacobs Engine Brake®

Fuel Tank Capacity 533 litres (140.8 US gal)

Certification OM471LA (MTU 6R 1300) is EU Stage IIIA / EPA Tier 3 emission level equivalent

#### TRANSMISSION Manufacturer Allison

Model 4700 ORS

Configuration Fully automatic planetary transmission

Layout Engine mounted

Gear Layout Constant meshing planetary gears, clutch operated

Gears 7 Forward, 1 reverse

Clutch Type Hydraulically operated multidisc

Control Type Electronic

Torque Control Hydrodynamic with lock-up in all gears

#### TRANSFER CASE Manufacturer

Kessler Series

W2400 Lavout

Remote mounted Gear Layout Three in-line helical gears

Output Differential Interaxle 29/71 proportional differential. Automatic inter-axle differential lock.

#### AXLES

Manufacturer Bell

Model

Differential High input controlled traction differential with spiral bevel gears

Final Drive Outboard heavy duty planetary on all axles

#### **BRAKING SYSTEM**

Service Brake Dual circuit, full hydraulic actuation wet disc brakes on front and middle axles. Wet brake oil is circulated through a filtration and cooling system.

Maximum brake force: 305 kN (68 567 lbf)

Park & Emergency Spring applied, air released driveline mounted disc

Maximum brake force: 218 kN (49 008 lbf)

Auxiliary Brake Jacobs Engine Brake®. Automatic retardation through electronic activation of wet brake system.

Total Retardation Power Continuous: 442 kW (593 hp) Maximum: 854 kW (1 145 hp)

#### WHEELS Type Radial Earthmover

Tyre

29.5 R 25 (875/65 R 29 optional)

#### **FRONT SUSPENSION**

Semi-independent, leading A-frame supported by hydropneumatic suspension struts Option: Electronically controlled adaptive suspension with ride height adjustment

#### REAR SUSPENSION

Pivoting walking beams with laminated rubber suspension blocks Option: Comfort Ride suspension walking beams, with two-stage sandwich block

#### **HYDRAULIC SYSTEM**

Full load sensing system serving the prioritised steering, body tipping and brake functions. A ground-driven, load sensing emergency steering pump is integrated into the main system.

Pump Type Variable displacement load sensing piston

Flow 330 L/min (87 gal/min)

Pressure 310 Bar (4 500 psi)

Filter 5 microns

#### STEERING SYSTEM

Double acting cylinders, with ground-driven emergency steering pump

Lock to lock turns

Steering Angle 42°

#### **DUMPING SYSTEM** Two double-acting, single stage, dump cylinders

Raise Time 11 seconds

Lowering Time 6 seconds

Tipping Angle 70 deg standard, or any lower angle programmable

#### PNEUMATIC SYSTEM

Air drier with heater and integral unloader valve, serving park brake and auxiliary functions

System Pressure 8,1 Bar (117 psi)

#### ELECTRICAL SYSTEM Voltage 24 V

Battery Type Two AGM (Absorption Glass Mat) type

Battery Capacity 2 X 75 Ah

Alternator Rating 28V 80A

#### MAX. VEHICLE SPEED

1st	4 km/h	2,5 mph
2nd	9 km/h	6 mph
3rd	17 km/h	11 mph
4th	23 km/h	14 mph

Х	Inner Turning Circle Radius - 29.5R25	4 866 mm (16 ft.)
Y	Outer Turning Circle Radius - 875/65 R29	9 320 mm (30 ft. 7 in.)
Y	Outer Turning Circle Radius - 29.5R25	9 235 mm (30 ft. 4 in.)

### Gradeability/Rimpull

- 1. Determine tractive resistance by finding intersection of vehicle mass line and grade line. NOTE: 2% typical rolling resistance is already assumed in chart and grade line.
- 2. From this intersection, move straight right across charts until line intersects rimpull curve.
- 3. Read down from this point to determine maximum speed attained at that tractive resistance.

### Retardation

- 1. Determine retardation force required by finding intersection of vehicle mass line.
- 2. From this intersection, move straight right across charts until line intersects the curve. NOTE: 2% typical rolling resistance is already assumed in chart.
- 3. Read down from this point to determine maximum speed.

## **B50E** Articulated Dump Truck

#### **ENGINE** Manufacture

Manufacturer Mercedes Benz (MTU)

Model OM473LA (MTU 6R 1500)

Configuration Inline 6, turbocharged and intercooled

Net Power 430 kW (577 hp) @ 1 600 rpm in accordance with UN ECE R120

Gross Torque 2 850 Nm (2 102 lbft) @ 1 300 rpm

Displacement 15,6 litres (952 cu.in)

Auxiliary Brake Jacobs Engine Brake®

Fuel Tank Capacity 630 litres (166 US gal)

Certification OM473LA (MTU 6R 1500) is EU Stage IIIA / EPA Tier 3 emission level equivalent

#### TRANSMISSION Manufacturer Allison

Model 4800 ORS

Configuration Fully automatic planetary transmission

Layout Engine mounted

Gear Layout Constant meshing planetary gears, clutch operated

Gears 7 Forward, 1 reverse

Clutch Type Hydraulically operated multidisc

Control Type Electronic

Torque Control Hydrodynamic with lock-up in all gears

#### TRANSFER CASE Manufacturer

Kessler Series

W2400 Lavout

Remote mounted Gear Layout Three in-line helical gears

Output Differential Interaxle 29/71 proportional differential. Automatic inter-axle differential lock.

#### AXLES

Manufacturer Bell

Model

30T Differential

High input controlled traction differential with spiral bevel gears

Final Drive Outboard heavy duty planetary on all axles

#### **BRAKING SYSTEM**

Service Brake Dual circuit, full hydraulic actuation wet disc brakes on front, middle and rear axles. Wet brake oil is circulated through a filtration and cooling system.

Maximum brake force: 458 kN (102 962 lbf)

Park & Emergency Spring applied, air released driveline mounted disc

Maximum brake force: 215,5 kN (48 446 lbf)

Auxiliary Brake Jacobs Engine Brake®. Automatic retardation through electronic activation of wet brake system.

Total Retardation Power Continuous: 546 kW (732 hp) Maximum: 963 kW (1 291 hp)

#### WHEELS Type Radial Earthmover

Tyre

875/65 R 29 (29.5 R 25 optional)

#### FRONT SUSPENSION

Semi-independent, leading A-frame supported by hydropneumatic suspension struts. Suspension is electronically controlled adaptive suspension with ride height adjustment.

#### **REAR SUSPENSION**

Pivoting walking beams with laminated rubber suspension blocks.

Option: Comfort Ride suspension walking beams, with two-stage sandwich block.

#### HYDRAULIC SYSTEM

Full load sensing system serving the prioritised steering, body tipping, suspension and brake functions. A ground-driven, load sensing emergency steering pump is integrated into the main system.

Pump Type Variable displacement load sensing piston Flow

330 L/min (87 gal/min) Pressure

310 Bar (4 500 psi) Filter

5 microns

#### STEERING SYSTEM

Double acting cylinders, with ground-driven emergency steering pump

Lock to lock turns 4,9

Steering Angle 42°

#### **DUMPING SYSTEM** Two double-acting, single stage, dump cylinders

Raise Time 11,5 seconds

Lowering Time 6 seconds

Tipping Angle 70 deg standard, or any lower angle programmable

#### PNEUMATIC SYSTEM

Air drier with heater and integral unloader valve, serving park brake and auxiliary functions

System Pressure 8,1 Bar (117 psi)

#### ELECTRICAL SYSTEM Voltage 24 V

Battery Type Two AGM (Absorption Glass Mat) type

Battery Capacity 2 X 75 Ah

Alternator Rating 28V 80A

MAX	VEHICLE SP	EED
1st	4 km/h	2,5 mph
2nd	9 km/h	6 mph
3rd	17 km/h	11 mph
4th	23 km/h	14 mph
5th	33 km/h	21 mph
6th	44 km/h	27,3 mph
7th	51 km/h	32 mph

#### CAB

R

ROPS/FOPS certified 77 dBA internal sound level measured according to ISO 6396

7 km/h

4 mph

### Gradeability/Rimpull

- 1. Determine tractive resistance by finding intersection of vehicle mass line and grade line. NOTE: 2% typical rolling resistance is already assumed in chart and grade line.
- 2. From this intersection, move straight right across charts until line intersects rimpull curve.
- 3. Read down from this point to determine maximum speed attained at that tractive resistance.

### Retardation

- 1. Determine retardation force required by finding intersection of vehicle mass line.
- 2. From this intersection, move straight right across charts until line intersects the curve. NOTE: 2% typical rolling resistance is already assumed in chart.
- 3. Read down from this point to determine maximum speed.

		ENGINE				CAB (continued)
•		Jacobs Brake Engine®	•	•		Manually adjusted mirrors
		Dual element air cleaner with dust ejector valve				Electrically adjusted and heated mirrors
		Precleaner with automatic dust scavenging				Deluxe 10" colour LCD:
		Water separator	•			Speedometer / Fuel gauge /
		Serpentine drive belt with automatic tensioner				Transmission oil temperature gauge /
		Provision for fast fill				Engine coolant temperature gauge /
		Wet-sleeve cylinder liners				LED function/warning indicators and
						audible alarm / Transmission gear selection /
		COOLING				Tachometer / Battery voltage / Hour meter /
•	•	Crankshaft mounted electronically controlled				Odometer / Fuel consumption / Tip counter /
		viscous fan drive				Trip timer / Trip distance / Metric/English units /
•	•	Fan guard				Service codes/diagnostics
					•	Backlit sealed switch module functions with:
		PNEUMATIC SYSTEM				Wiper control / Lights / Heated mirrors /
•	•	Engine-mounted compressor				Retarding aggressiveness / Transfer case
•		Air drier with heater				differential lock / Transmission gear hold /
•		Integral unloader valve				Dump-body tip limit / Automatic dump-body
						tip settings / Airconditioner/ Heater controls /
		ELECTRICAL SYSTEM				Preselected Speed Control
•	ullet	Battery disconnect				
•	٠	Drive lights				DUMP BODY
		LED Drive lights	•	•		Dump body mechanical locks (x2). Partially up
•	•	Air horn				and fully up
•	•	Reverse alarm				Body liner
▲		White noise reverse alarm				Tailgate
•	•	LED reverse lights				Body heater
•	•	Rotating beacon				Less dump body and cylinders
•	•	Pitch Roll Sensor				Low SG bin extensions
•	•	Halogen Artic reverse light				Bin pole lockout
		LED Artic reverse light				OTHER
		STEERING SYSTEM	•	٠	•	Automatic Traction Control (ATC)
•	٠	Bi-directional ground-driven secondary steering	•			Wet disc brakes
		pump	•			29.5 R 25 Radial Earthmover tyres
						875/65 R 29 Radial Earthmover tyres
		САВ	•			Remote grease banks
•	ullet	ROPS/FOPS certification				Automatic greasing
•	ullet	Tilt cab	•			Onboard weighing
•	•	Gas strut-supported door				Load lights: stack
•	•	I-Tip programmable dump-body tip settings				Comfort ride suspension (front)
•	•	HVAC Climate control system				Comfort ride suspension (rear)
•	•	AM/FM radio with Aux + USB				Reverse camera
•	•	Rear window guard				Hand rails
•	•	Wiper/washer with intermittent control				Cab peak
•	•	Tilt and telescoping steering wheel				High pressure hydraulic filter
•	•	Centre-mount air-suspension seat				Fuel heater
•	•	Halogen work lights		•	•	Belly cover
		LED work lights				Remote transmission filters
		Rotating beacon: seat belt installation			•	Engine and transmission remote drain-gravity
		Remote engine and machine isolation				Engine and transmission remote drain-scavenge
•	•	Remote battery jump start				Window smash button
•	•	Retractable 3-point seat belt			•	High visibility mirrors
•	•	Foldaway trainer seat with retractable seat belt				Fleetm@tic® Classic package for 2 years
		12-volt power outlet				Electronic bonnet opening
		Cab utility bin (removable)
