Free inspection subject to availability. Offer cannot be combined with any existing or future agreements or promotions. Stock availability may vary by branch. Offer valid until 30 June 2026.

**SAFETY TIPS** NEVER POSITION YOURSELF OR OTHERS IN THE LINE OF FIRE

- Always be aware of the hazards around you. Look above, below, wide and close and consider the path of potential travel of hazardous forms of energy or moving objects.
- Understand the machines and operations in your work area.
- Take the time to think about the possible consequences that may result from where you place your body, or the actions you perform.
- Think about the impact of your actions on those around you and ensure a recovery plan is in place.

**Always complete a TAKE 5 prior to commencing any new job or task.**

**SEE YOU TOMORROW**

**TECH TIPS** HYDRAULIC ATTACHMENT USE ACCELERATES SYSTEM WEAR

Frequent use of hydraulic attachments such as breakers, augers and compactors increases heat load, pressure cycling and oil contamination within hydraulic systems. This accelerates wear in pumps, motors and final drives.

To reduce unplanned downtime, inspection and oil-change intervals should reflect actual attachment usage rather than standard operating hours. Regular oil sampling and condition monitoring help identify early wear and protect component life.

**Speak with your Hitachi branch to review inspection and service intervals based on your operating profile.**

**LANDCROS Connect**

# Smart Fleet Solutions.

**Equipment performance is everything in the field.**

LANDCROS Connect gives you daily visibility of machine health, utilisation and location. Whether you operate a single machine or manage a fleet, it supports better maintenance planning, improved uptime and more informed decisions.

Access operational and performance data anywhere, anytime.
